

MANUAL TORQUE MULTIPLIER HT7-5:1 – TECHNICAL DATA

PART 16067

MANUAL TORQUE MULTIPLIER HT7-5:1 – TECHNICAL DATA

PART 16067

DESCRIPTION

The Christie Manual Torque Multiplier HT7-5:1 employs multiple stages of epicyclic gearing to give a accurate torque output and ratio.

Ratio quoted is the torque multiplication ratio, not the velocity ratio as given for some competitor's products. For example, the velocity ratio may be 5.333:1 to give a torque multiplication of 5:1 +/-4%.

The reaction force works in the opposite direction to the applied torque. The point of reaction should be kept as far away as practicable from the centre of the gearbox to minimize this force.

The reaction foot is quickly detachable and reversible to allow for tightening and un-tightening reaction positions. It is also possible to remove the reaction foot and react using the square box section only.

Where the standard reaction plate is not suitable, it may be possible to adapt it. Please contact W. Christie (Industrial) Limited for assistance.

The HT7-5:1 must always be used with the following:-

- Impact Quality Sockets
- Reaction Arm
- Manual Torque Wrench

SPECIFICATION

Part Number:	16067
Input Square:	3/4" Female (19.05mm)
Output Square:	1-1/2" Male (38.1mm)
Direction:	Forward / Reverse
Torque Accuracy:	+/- 4%
Torque Ratio:	5:1
Velocity Ratio:	5.333:1
Minimum Output Torque:	600 Nm (450 lbf.ft)
Maximum Output Torque:	6,000 Nm (4500 lbf.ft)
Maximum Input Speed:	12 rpm
Tool Weight:	8.1 Kg (17.86 lbs)
Reaction Plate Weight:	6.3 Kg (13.89 lbs)

ACCESSORIES AVAILABLE

The following accessories are available upon request and can be custom made to suit requirements. Please contact W. Christie (Industrial) Limited for more information:-

- Electronic Torque Transducers (For Precise Torque Monitoring)
- Manual Torque Wrench
- Special Reactions
- Impact Quality Sockets
- Torque Checking System (Rundown Fixture)

No statement or data within this literature is warranted or guaranteed to be accurate.
