Inspection Camera System

The W. Christie inspection camera system is the perfect tool for the visual inspection of 'out of reach' areas or difficult access situations.

This inspection camera system is both completely portable and easy to use. It also saves time by reducing the need to set-up access and safety equipment for visual inspection. This means visual inspections can be carried out more regularly, making it the perfect preventative maintenance tool.

Routine Inspection of Rail Rolling Stock

Currently in use for the visual inspection of train roofing areas to check for general damage and integrity of roofing rivets.

- Easy to use, complete integral system – 'switch on and go'
- 1 person operation
- Save time and money due to minimal set-up required
- Costly repairs can be minimised when used as a preventative maintenance tool
- Light, yet robust
- Adjustable in both length and angle to allow positioning exactly where needed
- Provides clear images on the colour TFT screen, even in the dark
- Safe 12V power usage

5.6" Colour TFT monitor & control panel

Supplied complete with neck strap
