VC-RAD 31 ELECTRIC TORQUE MULTIPLIER (HIRE) – TECHNICAL DATA

DESCRIPTION

The VC-RAD 31 Electric Torque Multiplier is a hand held, non-impacting electrically driven power tool designed to apply torque to tighten and remove threaded fasteners.

The reaction force works in the opposite direction to the applied torque. The point of reaction should be kept as far away as practicable from the centre of the gearbox to minimise this force.

Torque is controlled by adjusting the torque setting dials. Corresponding settings and torques are determined using the calibration certificate provided.

The VC-RAD 31 must always be operated with the following:-

- 110v or 240v Electrical Supply (Dependant on model purchased)
- Impact Quality Sockets
- Reaction Arm
