C-RAD 68 PNEUMATIC TORQUE WRENCH – TECHNICAL DATA

DESCRIPTION

The C-RAD 68 Pneumatic Torque Wrench is a hand held, non-impacting air driven power tool designed to quickly and accurately apply torque to and remove threaded fasteners.

The reaction force works in the opposite direction to the applied torque. The point of reaction should be kept as far away as practicable from the centre of the gearbox to minimise this force.

Torque is controlled by regulating air pressure via a Lubro control unit. Corresponding pressure settings and torques are determined using the graph provided.

The C-RAD 68 must always be operated with the following:-

- Clean dry air supply with a minimum flow of 19 litres/second (40 cfm)
- Lubro Control Unit (with filter regulator, lubricator)
- Minimum Hose Bore 1/2" (12mm)
- Impact Quality Sockets
- Reaction Arm
